OBJECTIVE

Aspiring Data Scientist and current AI Solutions postgraduate student seeking to contribute as intern to Bombardier's Digital Innovation Office.

HIGHLIGHTS OF QUALIFICATIONS

- Currently pursuing a postgraduate certification in Applied A.I. Solutions Development.
- 2+ years in the management field working with data for business decision making.
- Proficient in SQL and Python (Pandas, NumPy, Scikit-learn, Matplotlib, NLTK, TensorFlow).
- Engineered interactive Power BI dashboards to visualize complex datasets and KPIs.
- Overhauled departmental reporting structures.
- Accelerated data wrangling workflows by 10x.

EDUCATION

Applied A.I. Solutions Development

Postgraduate | George Brown Polytechnic

Programming for Data Analytics

Associate's degree | SENA National Learning Service

Industrial Administration

Bachelor's degree | University of Cartagena

GPA: 3.2/4.0

Recognition: Best student of the ninth semester.

Jan 2026 - Present

2024-2025

2015-2021

WORK EXPERIENCE

Data Analyst | SENA

Feb 2025 – Dec 2025

- Consolidated and maintained student academic tracking data through monthly ETL processes on hundreds of spreadsheets, ensuring data integrity for departmental KPIs.
- Delivered monthly reports revealing key student progression trends, supporting Academic Affairs monitoring objectives.
- Automated data wrangling for reporting using Python, reducing processing time from 30–40 minutes to 2–3 minutes per report while virtually eliminating manual errors. Project repository: [Maestro de fichas](#)
- Enhanced report professionalism by redesigning format with institutional branding elements.

Management Trainee | Katoen Natie

Aug 2024 – Feb 2025

- Established and tracked team productivity metrics by measuring storage and dispatching volume per shift, creating visibility into operational performance where none existed before.
- Built a Power BI dashboard to monitor daily productivity data and presented weekly reports to the Chief Operating Officer, enabling data-driven oversight of warehouse operations.
- Identified process improvement opportunities through observation and personnel feedback, using data analysis to validate recommendations before implementation.
- Optimized warehouse product storage layout, using before/after data to quantify capability improvements and secure leadership approval for standardization.
